Renovations Insulated Siding

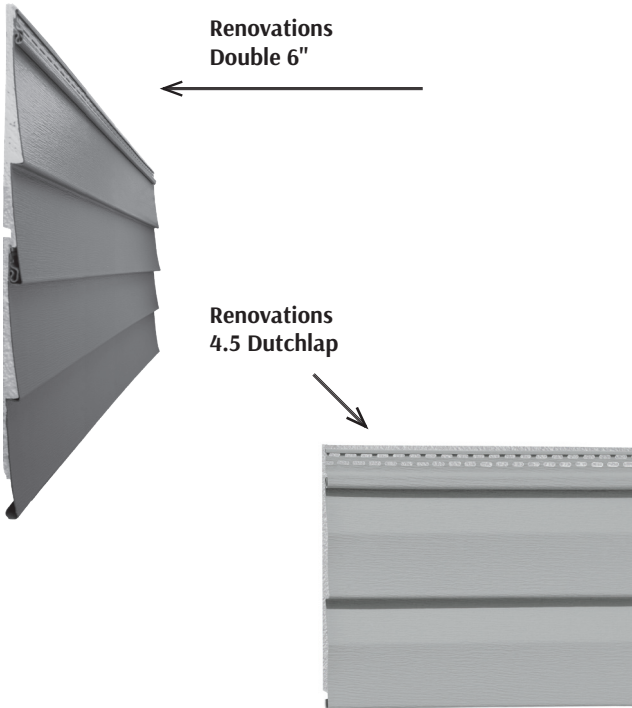

Renovations... Insulated Siding by Polaris®

Renovations is engineered with the Tuff-Lock™ and Tuff-Hem™ locking system and a Double Staggered Nail Hem making installation efficient and added protection from wind blowouts.

Renovations rigid EPS progressive foam is laminated to the panel. The foam contains Preventol® providing protection against termites. The EPS foam also assists with surface irregularities, giving rigidity and a solid feel to the panel.

Polaris is now stocking several colors in the Renovations D6 and 4.5 Dutchlap panels, as well as insulated outside corners.

UltraSide with Double Staggered Tuff-Hem™ Nail Hem

Polaris® UltraSide Siding by Style Crest® Inc. provides twice the nailing surface of standard siding. Every sheet has two rows of slots in staggered configuration.

This not only enhances the stability of the siding to resist sagging or twisting, but also greatly improves attachment strength allowing it to hold tight in gale force winds.

With a thick gauge of .046 and special UV color protection, this panel can withstand whatever weather Mother Nature brings it's way.

Roughsawn Cedar Beauty Made to Last

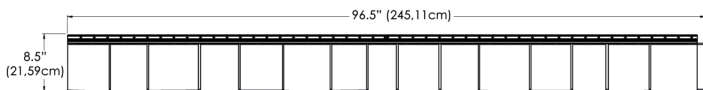

Homescape RS8 8' Roughsawn siding will give any home – new or remodeled – a classic look derived from the eastern shores. This stunning alternative to real wood shakes will deliver performance and low maintenance that will be appreciated for years to come.

Built to withstand the harsh effects Mother Nature can offer, the Homescape RS8 panel is also surprisingly lightweight – so there's no need to worry about additional weight on the structure or exterior wall.

The one-piece construction affords a seamless appearance. In addition, its single course design makes installation a breeze, allows for precise measurement and reduces overall waste of material.

Polaris is now stocking several colors in the Homescape RS8 product line. In addition we offer matching colors on corners and j-channels for almost the entire RS8 color palette.

SS7 Split Shake Siding Beautiful and Durable

Homescape SS7 Split Shake Siding offers woodgrains that are textured to look authentic with the appearance of knots, gouges, splits etc. that are built in design features. There are 20 different wood grains per panel by an eight panel series which equals 40 feet of no repeat.

The deeply textured design is used by leading builders to break up very wide or tall spans on building or homes into smaller, more interesting areas to change the visual scale, or to improve how it looks and blends with the topography of its site.

All colors offered are formulated with acrylic capstock for lasting fade protection. Polaris is now stocking several colors in the Homescape SS7 Split Shake Siding panels and matching 3/4" J-channels. 1-1/8" receiver corners are available in many matching colors.
